Education

Addis Ababa University

Expected Graduation: 2026

B.Sc. in Information science

Addis Ababa, Ethiopia

- **Relevant Coursework:** Software Requirements Engineering (Requirements Analysis), Machine Learning, Software Design & Architecture (UML & Design Patterns), Prompt Engineering, Networking, Web Engineering (Full-Stack Development), Mobile Development

Experience

Revelo

Jan 2026 – Apr 2026

AI Training

Remote

- Contributed to AI training by evaluating model outputs, identifying errors, and improving response quality.
- Worked on data annotation and validation to ensure accuracy, consistency, and reliability of AI systems.

Blue Peak Web Solutions

Oct 2025 – Dec 2025

Backend Developer

On-site

- Delivered high-performance websites and scalable e-commerce solutions.
- Built internal systems (inventory, booking, dashboards) to streamline operations.

iCog Labs

Apr 2026 – Jul 2026

AI Engineer Intern

On-site

- Developed AI-powered applications using large language models (LLMs) and machine learning techniques.
- Designed data processing workflows, evaluated model performance, and collaborated on deploying AI solutions for real-world use cases.

Projects

Blood Donation Management System | Golang, Vue.js, Nuxt.js, TypeScript, Tailwind CSS

- Developed a full-stack blood donation management system with donor registration, inventory management, and hospital request workflows.
- Built a scalable backend, responsive frontend, and integrated real-time updates with SMS notifications.

HR-AI Agent | React.js, Next.js, Node.js, Express, TypeScript, Tailwind CSS, Supabase, VAPI, Gemini 2.0

- Developed an AI-powered HR automation platform for candidate screening, resume analysis, and job matching.
- Automated interview scheduling, invitations, and candidate management with secure authentication and real-time data handling.

Swift Delivery Secure Platform with Payment Integration | Next.js, React.js, Nest.js, PostgreSQL, Chapa, Tailwind CSS

- Built a full-stack e-commerce platform with secure authentication, role-based access, product and order management, payment integration (Chapa), and an analytics dashboard.

CodLingo | Flutter, Python, Celery, Redis, Docker

- Built a gamified mobile app that encourages consistent coding by recommending daily GitHub issues and open-source repositories based on users' preferred programming languages.
- Developed a Python backend with Celery, Redis, and Docker to automate task scheduling, repository recommendations, and contribution tracking while rewarding users for commits, pull requests, and issue resolutions.

Technical Skills

Languages: Go (Golang), JavaScript, TypeScript, Python, Rust

Frontend: Vue.js, Nuxt.js, React, Tailwind CSS, shadcn/ui, Redux

Backend: Node.js, NestJS, Fast api, Next.js API Routes

Databases: PostgreSQL, Firebase, Supabase

API & Tools: GraphQL, REST APIs, Stripe, OpenAI API

Other: Git, GitHub, Vercel, Component-Based Architecture, State Management, Authentication & Authorization, Performance Optimization, Debugging, Deployment
